Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/561,124	Applicant(s) BEYAR ET AL.	
	Examiner Paul B. Prebilic	Art Unit 3774	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Election/Restrictions

Applicant's election without traverse of Group I, species A, species X, and species VA in the reply filed on July 20, 2009 is acknowledged.

No currently pending claims are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention or species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on July 20, 2009.

Claim Objections

Claims 5 and 6 are objected to because of the following informalities:

Regarding claim 5, on lines 1-2, the language "at least a second end one end engaging a second end" is grammatically awkward and unclear.

Regarding claim 6, on line 1, "said two engaging ends" lacks antecedent basis.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4-8, 10-21, 23-26, and 30-42 are rejected under 35 U.S.C. 102(b) as being anticipated by Bonutti (US 5,707,390). Bonutti anticipates the claim language where the axial member as claimed is body (22) of Bonutti (see Figures 1 to 5 and column 4, lines 35-67) and the pliable tube as claimed is the sleeve (14) of Bonutti.

Regarding claim 6, the deforming of Bonutti can have a lock as claimed; see column 9, lines 26-40.

Regarding claim 13, the channel as claimed is the central passage (26) of Bonutti.

Regarding claim 15, the Applicant is directed to Figures 29 and 30 where the axial member is element (366) and the channel is element (360).

Regarding claim 18, the Applicant is directed to Figure 25 and column 12, lines 45-59 where a bag is utilized.

Regarding claim 19, the Applicant is directed to column 17, lines 23-35.

Regarding claims 20 and 32, the Applicant is directed to Figures 44 and 45 and column 15, lines 23-37.

Regarding claim 23, the Applicant is directed to Figures 6D, 6E and 6F where asymmetrical volumes are shown.

Regarding claim 30, the Applicant is directed to column 17, lines 1-7.

Regarding claim 33, the screw thread on body (22) is circumferential.

Regarding claim 34, the deforming can be inflated such that 100% of the volume is filled.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 27-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bonutti (US 5,707,390) alone. Bonutti meets the claim language except fails to disclose the transaxial force, applied force, or shore hardness as claimed. However, since the deformer of Bonutti can be used on joints (see Figures 17 and 18), the mere use/design with particular force and hardness values would have been considered *prima facie* obvious to an ordinary artisan in view of Bonutti alone that discloses a wide variety of materials (see column 17, lines 1-7) and uses (see the figures).

Conclusion

Applicant should specifically point out the support for any amendments made to the disclosure, including the claims (MPEP 714.02 and 2163.06). Due to the procedure outlined in MPEP 2163.06 for interpreting claims, it is noted that other art may be applicable under 35 USC 102 or 35 USC 103(a) once the aforementioned issue(s) is/are addressed.

Applicant is respectfully requested to provide a list of all copending applications that set forth similar subject matter to the present claims. A copy of such copending claims is respectfully requested in response to this Office action if the application is not stored in image format (i.e. the IFW system) or published.
